

The Cool Side of Solar Thermal

Mobile Solar Thermal Heating System

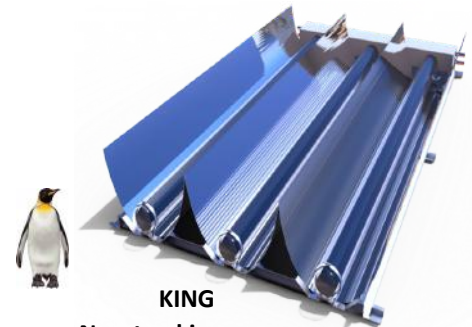

Mobile and portable Solar Thermal system simplifies the integration of a Renewable Energy heating option for Commercial & Industrial heating applications.

A stand-alone turn-key solution for the mobile solar thermal heating market.

- **Oil & Gas** process water mitigation.
- **Municipal** permanent installations for WWTP
- **Industrial Process Heat** at manufacturing and food production facilities.

The 30-collector unit has an integrated circulation system with circulation pump and heat exchanger to transfer up to 165,000 BTU/hour.

Generating temperatures from 60oC/140oF up to 200oC/400oF.

KING
Non-tracking
Concentrating Collector

Benefits

- ▣ Stand alone complete turn-key solution.
- ▣ Set on ground or container trailer.
- ▣ Easy assembly and disassembly to move to another location.
- ▣ 30-40% Federal Tax Credit for all components, materials and installation labor.*
- ▣ Thermal Energy Storage (TES) capable.
- ▣ Non-tracking design reduces O&M costs
- ▣ Collects both direct and indirect sunlight
